

Task Force Recommendation

Charged with the goal of creating a recommendation for an aquatic center, the West Linn Recreation Center Task Force examined consultants' studies, user requirements, and voter perception and recommended that the City Council commit to pursuing a pool and recreation center. The Center can become a healthy destination for all at the heart of the community. The Center can help facilitate the vision of the City of active families, water safety, and engaged citizens.

The West Linn Recreation Center Recommendation was presented to the West Linn City Council at a Work Session on April 18, 2011. The West Linn Recreation Task Force Recommendation to City Council and the presentation they utilized are both available below.
